**Plenary sessions**

- P01** - Pathways to Sustainable Space Weather and Space Climate Activities
- P02** - Synergies Between Ground-Based and Space-Based Instrumentation: What, Where, Why, When, and How?
- P03** - Space Weather Services for Aviation: early experiences, needs, and possible ways forward
- P04** - Smallsats, Hosted Payloads, and 'Piggyback Missions' for Monitoring the Space Environment - Missions from Europe and Beyond: Advances, Benefits, and Funding Mechanisms

**Parallel Space-Weather Research (SWR) Sessions:**

- SWR-01** - Solar Activity and Eruptions as the Origins of Space Weather
- SWR-02** - Coronal Mass Ejections and Solar Energetic Particles
- SWR-03** - Coupling in the Earth's Magnetosphere, Ionosphere and Thermosphere
- SWR-04** - Space Weather and Climate as Factors in Mission Design for Dependable Operations and Data Streams
- SWR-05** - Geomagnetic Activity Induced Effects on Ground-Based Systems
- SWR-06** - Applications of Artificial Intelligence to Space Weather and Space Climate

**Parallel 100% Community-Driven Session:**

- CD-01** - Space Weather, Radiation and Heliophysics from the Lunar Orbiting Platform Gateway
- CD-02** - All about the Solar Wind
- CD-03** - Assessment of Space Weather Modelling Capabilities: Challenges and Future Directions
- CD-04** - Addressing uncertainty in space weather data and models
- CD-05** - Multi-point measurements in space for Space Weather applications
- CD-06** - Space Climate
- CD-07** - Space Weather data infrastructure: standards and FAIR approach
- CD-08** - Flare forecasting research: where are we now?
- CD-09** - Advancements in theory, instrumentation and exploration of space weather data sensing middle and lower ionosphere

**Speaker Ready Room**  
Latecoere

**Parallel Meeting Room**  
Diamant

**Escape Game**  
To be found...

**Child Care**  
Daurat

**Quiet Room**  
Demarmier
